# Elvis Munteanu

Python Developer Django REST Framework Odoo Prompt Engineer  
Bucharest, Bucharest, Romania

## Summary

As a Python Developer at Sostenia, I apply my solid knowledge of computer science concepts, data structures, and object-oriented design to customize and integrate Odoo, a comprehensive suite of business applications. I analyze the company's requirements and processes, develop custom modules and extensions, optimize the system performance, and create and maintain technical documentation. I collaborate with other developers, project managers, and stakeholders to ensure that the customized solution meets the company's needs and aligns with its goals.

In addition, I work as a Python Trainer at Software Development Academy, where I design and deliver engaging Python programming courses for a diverse online audience. I assess student progress, provide feedback, and tailor instructional methods to suit individual learning needs. I continuously update course content to reflect current industry standards and best practices, and facilitate active learning through discussion boards, webinars, and interactive assignments. I stay updated with the latest developments in Python and related technologies, such as Django, REST API, XML, and databases.

I have a Bachelor's degree in Economical Informatics from Universitatea „Alexandru Ioan Cuza” din Iași and a Python Development certificate from LINK Academy Romania. I also hold certifications in MTA: Database Administration Fundamentals, The Complete Python Course, and M001: MongoDB Basics. I am familiar with HTML5, CSS, JavaScript, GIT, Windows, Linux, and Mac. I am looking to work as a software developer in a fast-paced tech environment to turn complex requirements into reliable software that end users and customers will love.

---

## Experience

## Sostenia

### Odoo Python Developer

January 2023 - Present (3 years 5 months)

Bucharest, Romania

- Analyze the company's requirements and processes to identify areas where customization or new modules are needed.
- Develop custom modules and extend existing ones to implement new features or modify the behavior of the system.
- Integrate Odoo with other software and systems used by the company, such as CRM, ERP, or e-commerce platforms.
- Optimize the performance of the system by identifying bottlenecks and implementing solutions to improve system efficiency.
- Create and maintain technical documentation for the customizations and integrations developed.
- Collaborate with other developers, project managers, and stakeholders to ensure that the customized solution meets the company's needs and aligns with its goals.
- Provide technical support and assistance to users, addressing any issues or bugs that arise during the use of the customized system.
- Keep up-to-date with the latest Odoo releases and features, ensuring that the customizations are compatible with new versions and can be easily migrated.
- Implement security measures and best practices to protect the company's data and ensure the integrity of the system.
- Participate in code reviews, testing, and quality assurance processes to ensure the customizations are reliable, maintainable, and of high quality.

## Software Development Academy

### Python Trainer

December 2022 - June 2024 (1 year 7 months)

Bucharest, Romania

Design and deliver engaging Python programming courses for a diverse online audience, ensuring content relevancy and quality.

Assess student progress, provide feedback, and tailor instructional methods to suit individual learning needs.

Continuously update course content to reflect current industry standards and best practices.

Facilitate active learning through discussion boards, webinars, and interactive assignments.

Collaborate with other educators and the content team to ensure a cohesive learning experience for students.

Stay updated with the latest developments in Python and related technologies.

## Ivanti

### Software Engineer

May 2022 - December 2022 (8 months)

Bucharest, Romania

#### Ivanti incaptic Connect APP

Improve the existing platform;

- Add new features and functionality;
- Improve existing codebase;
- Develop using the best coding practices;
- Communicate with the team;
- Participate in scrum process, estimations, sprint commitments and retrospective
- Code review.

Technologies used:

- Python & Django
- Basic frontend technologies (HTML/CSS/JS) and React
- REST APIs
- Fastlane
- PostgreSQL
- Celery
- Redis
- GIT / Github / Github actions
- Jira

## Meet Metrics

### Python Developer

July 2021 - May 2022 (11 months)

Bucharest, Romania

- Writing back-end programming in Python using Django Rest Framework to design scalable API.

- Develop consumer based features and applications using Python and Django in test driven Development
- Improved code reuse and performance by making effective use of various design patterns.
- Taken part in entire lifecycle of the projects including Design, Development, and Deployment, Testing and Implementation

## Expressoft Technology

### Computer System Engineer

November 2018 - January 2020 (1 year 3 months)

București

Responsible for configuration, implementation and providing support for hardware and software solutions distributed by the company to our partners and clients. The programs that are used include complete solutions to operate in HORECA industry.

- Other actions that helped me in my programming path include debugging the applications and extracting information from databases when a malfunction occurred.
- Gained communication skills from performing trainings to clients and Customer Experience seminars.

## Valoris Center

### Bitdefender Technical Support Agent

January 2018 - November 2018 (11 months)

Bucharest, Romania

Duties and Responsibilities:

- Providing Technical and commercial support to Bitdefender home and business clients. The majority of clients were from U.S.A. and U.K. and we assisted them via phone, email and live chat.
- Approaching and solving the tasks using procedures from a permanent changing flowchart;
- Providing technical support information to the new team members;
- Gathering the required information in order to escalate complex situations to a higher department;
- Create and implement working procedures;
- Attitude based on customer experience;
- Result orientation and problem solving.
